No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

Sequence 14306, Application US/09270767

Patent No. 6703491

GENERAL INFORMATION:

APPLICANT: Homburger et al.

TITLE OF INVENTION: Nucleic acids and proteins of TITLE OF INVENTION: Nucleic acids and proteins of CURRENT APPLICATION NUMBER: US/09/270,767

CURRENT APPLICATION NUMBER: US/09/270,767

CURRENT FILING DATE: 1999-03-17

NUMBER OF SEQ ID NOS: 62517

SOFTWARE: PatentIN Ver. 2.0

SEQ ID NO 14306

LENGTH: 2064

Patent No. 6610534
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: No. 6610534artis AG
TITLE OF INVENTION: Induction of blood vessel formation through administration of
TITLE OF INVENTION: polymucleotides encoding sphingosine kinases
FILE REFERENCE: 4-31617
CURRENT APPLICATION NUMBER: US/09/970,516
NUMBER OF SEQ ID NOS: 6
SOFTWARE: Patentin version 3.1

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 30448, Application US/09270767

Patent No. 6703491

GREERAL INFORMATION:

APPLICANT: Homburst et al.

TITLE OF INVENTION: Nucleic acids and proteins of Drosophila melanogaster

FILE REPERENCE: File Reference: 7326-094

CURRENT PAPLICANTION NUMBER: US/09/270,767

CURRENT FILING DATE: 1999-03-17

NUMBER OF SEQ ID NOS: 62517

SOFTWARE: PatentIn Ver. 2.0

SEQ ID NO 30448

LENGTH: 901

TYPE: DNA
                                                                                                                                                                                                                                                                                                                                                                                         102 AsnHisProArgAlaValLeuValProSerSerLeuArgileGlyIleIleProAlaGly

Database :

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
